# Prerequisites

To start of you need a Telegram App that's it, to download click the link below.

<https://telegram.org/>

## Why Telegram?

- Well in short Telegram is widely available mobile, desktop, watches and TV's.
- Telegram messages are heavily encrypted.
- Telegram has an open API and protocol free for everyone.
- Telegram is COOL...

# SMS to Telegram

In a nutshell, it just forwards SMS from your phone to Telegram.

## Why?

Well let's say you have a phone and for some reason you left at home. And you need to access a 2-factor authentication website, with help of SMS to Telegram you can receive you OTP on telegram, on a desktop or web.

## Is it secure?

Yes, The App forwards your SMS directly to your Telegram, no proxy servers are in between. The project is open sourced. Link below <https://github.com/smjltd/SMStoTelegram>

However, sending an SMS from your telegram goes through our Servers. This was done because it's not technically possible to identify your device, unless its registered on our servers. *This option is totally optional you can skip it.*

# App Setup

## Step 1:

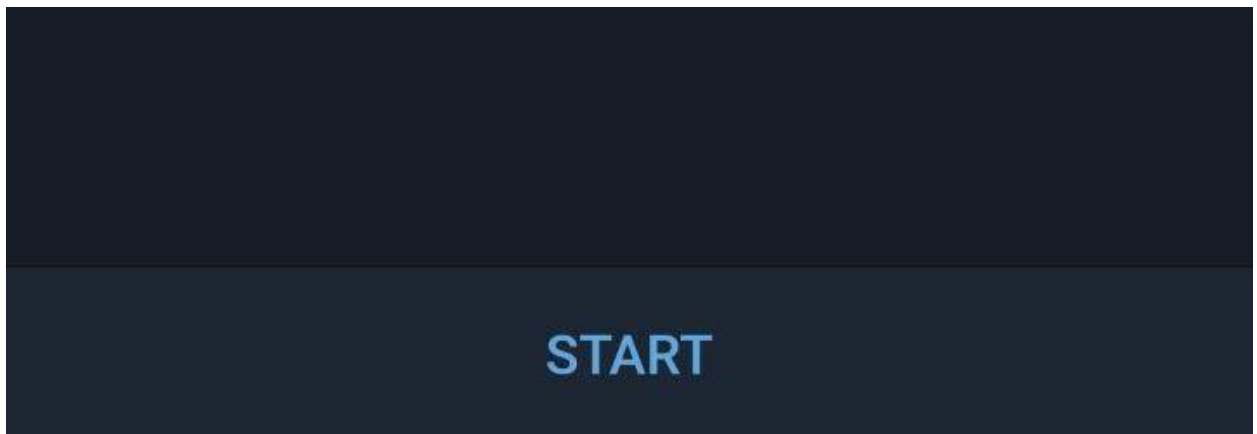

Install the app from play store, link below

<https://www.smj.ltd/SMStoTelegram>

## Step 2:

Identify your telegram id (this setup is crucial without it, you will not be able to forward SMS).

- Simply launch Telegram and search for @SMStoTeleBot
- Click Start

- You will see your Telegram ID

In this case **354446473**.

Note: For groups refer Section No 7: Adding Bot to Group

### **Step 3:**

Go to “SMS to Telegram” App and do the following action.

- Click the “Telegram ID” Button at bottom of the display

## Set Telegram ID

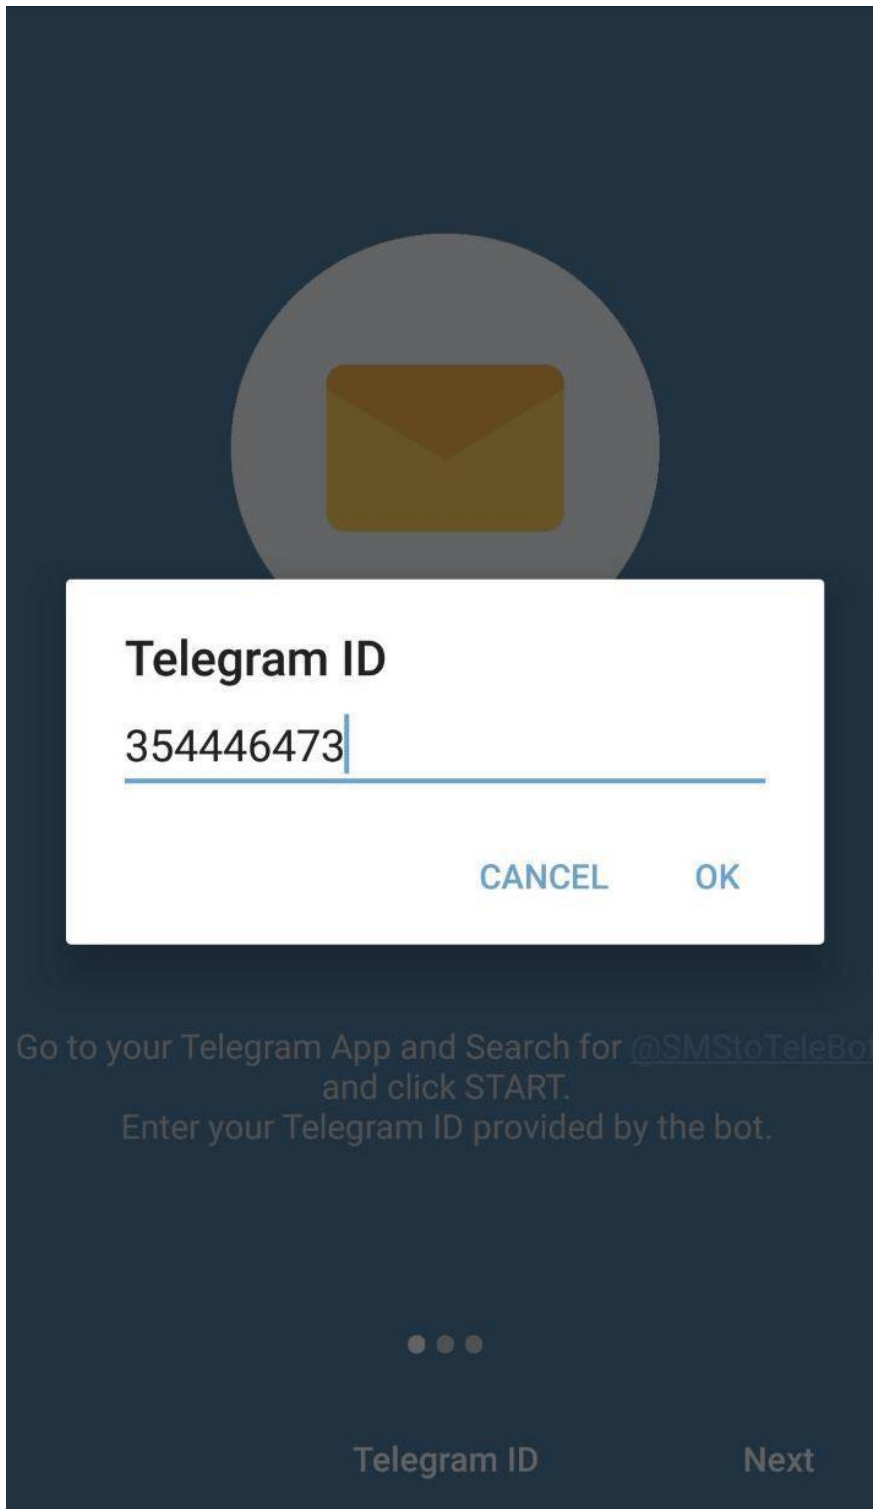

Go to your Telegram App and Search for [@SMStoTeleBot](#) and click START.  
Enter your Telegram ID provided by the bot.

Telegram ID

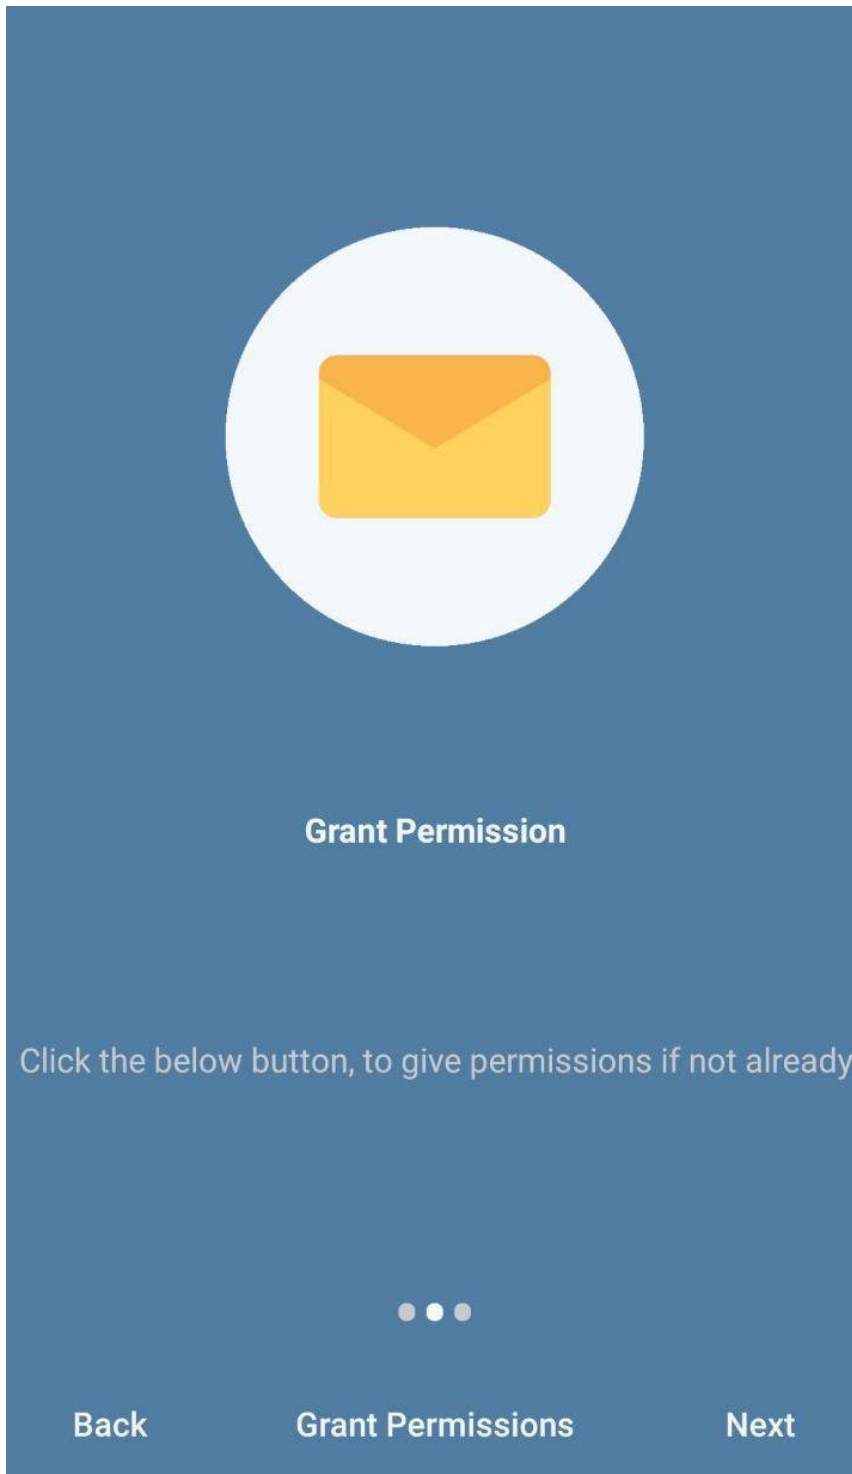

Next

- Enter the Telegram ID (example **354446473**), and press Next

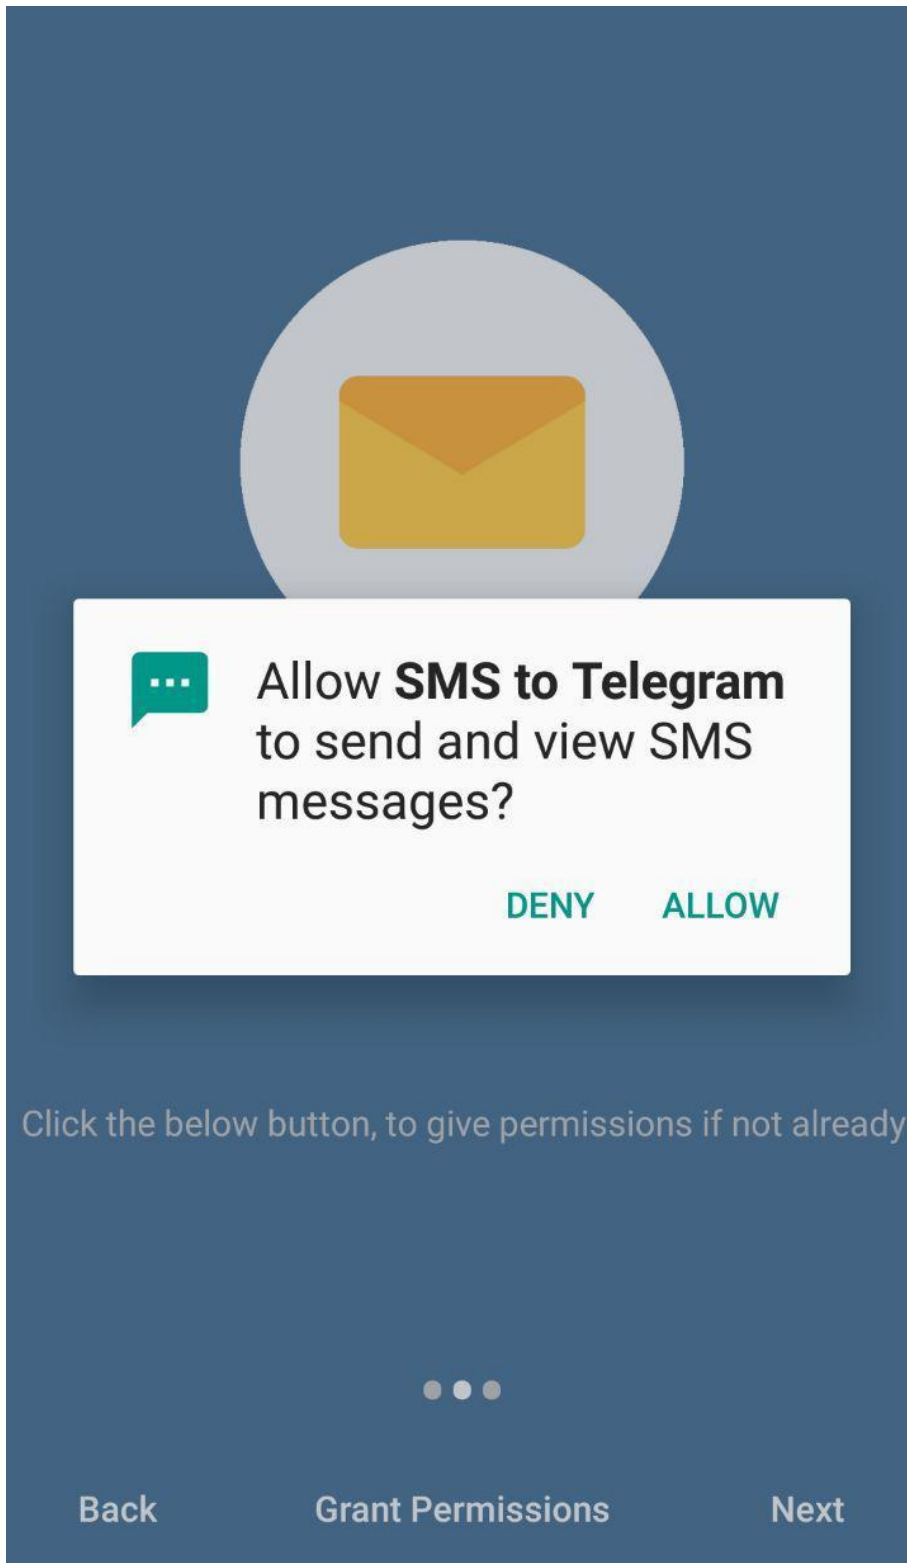

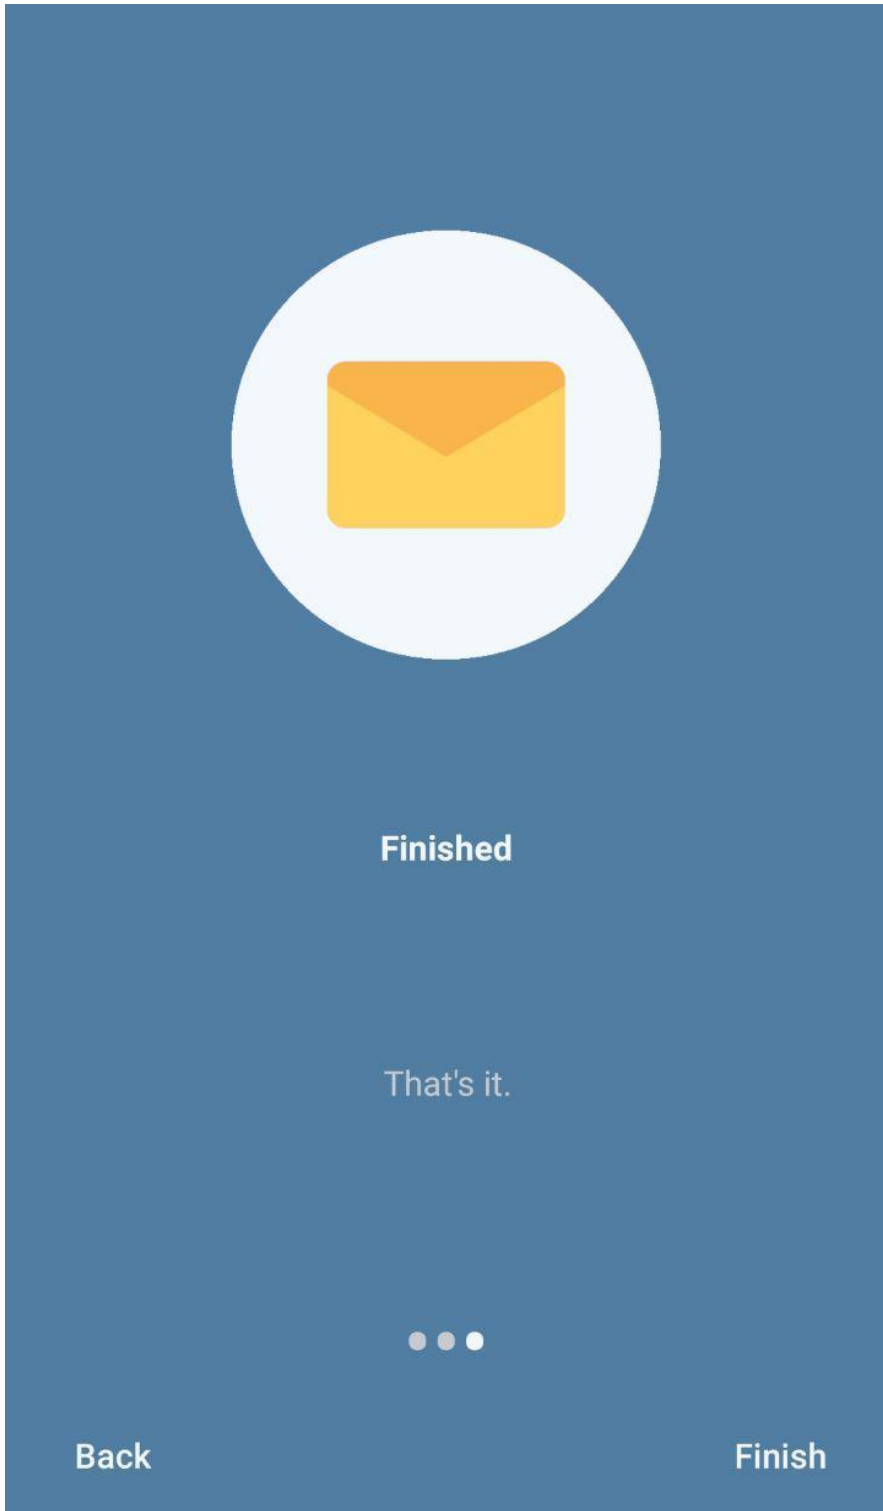

- Click the “Grant Permission” Button at bottom of the display

- Click “ALLOW” and then Next.

- And That's you are done.

**Step 4:**

- You should be able to receive SMS now, SMS Bot will show you SMS Sender, device you are receiving from and the SMS body itself.
